

HRISHITA PATRO

ARTIFICIAL INTELLIGENCE & DATA SCIENCE STUDENT

7977350002 | patrohrishita2612@gmail.com | hrishitapatro.vercel.app | linkedin.com/in/HrishitaPatro | github.com/patrohrishita2612-droid

OBJECTIVE

Driven Artificial Intelligence & Data Science student with a strong academic foundation and a passion for technology, problem-solving, and innovation. Combining developing technical skills in programming and web development with strong communication, leadership, and analytical abilities. Eager to explore emerging technologies, build practical solutions, and contribute to impactful projects in collaborative environments.

EDUCATION

Dwarkadas J. Sanghvi College of Engineering — Mumbai, India

2025–2029

B.Tech in Artificial Intelligence & Data Science

Class XII

2025

MHCET: 98.60 percentile | HSC: 75%

St. Joseph's Convent

2023

Class X – 89%

EXPERIENCE

MINITHON 4.0 – One-Day Build Challenge

CSI TSEC (Computer Society of India, TSEC) — Participant | 1 October 2026, TSEC

- Competed in a one-day, team-based hackathon, turning an idea into a working project under time pressure; built the Digital Footprint & Privacy Risk Auditor (see Projects); received a participation certificate.

Unplugged: Enter the Wild – 24-Hour Hardware Hackathon

DJS IETE-SF, in collaboration with DJS Microminds — Participant

- Designed a schematic and PCB layout in KiCad for the central control system of a line-follower car, integrating ESP32, motor drivers, IR sensors, GPS, and solar-based power management.
- Built a complete CAD assembly of the chassis and mechanical structure in Fusion 360, factoring in structural design, accessibility, and thermal considerations.

HACKOPS '26 – Internal Hackathon

AI & Data Science Department, Dwarkadas J. Sanghvi College of Engineering — Participant

- Learned how to break down and approach a real-world problem statement, with mentor guidance on strategic thinking and planning.
- Gained exposure to structured ideation and technical decision-making in a hackathon setting.

Hackprep 7.0 – DJUnicode Flagship Event

DJUnicode — Attendee

- Attended sessions on UI/UX, HTML, CSS, JavaScript, React, and Node.js for frontend development.
- Learned Python, Django, React Native, and Flutter fundamentals for building websites and applications.

DJS Infomatrix Bootcamp

AI & DS Department, in collaboration with DJS InfoMatrix — Participant

- Completed hands-on training in web development fundamentals, building practical projects including a task management board and an art exhibition website (see Projects).

PROJECTS

Digital Footprint & Privacy Risk Auditor

Built during MINITHON 4.0 (CSI TSEC)

- Developed a platform that maps how a user's accounts, linked services, app permissions, and recovery emails/phone numbers connect, without storing any real passwords.
- Built a connection graph and network-aware risk score (breach history, permissions, password reuse, missing 2FA) that flags single points of failure, such as one email account able to reset many others.
- Added a prioritized fix checklist, search and filters, simulated breach alerts, and a privacy dashboard tracking improvement over time.

3D Space Portfolio | React, TypeScript, Three.js, Vite

Live: hrishitapatro.vercel.app

- Built and deployed an interactive space-themed personal portfolio with explorable 3D destinations for projects, about, skills, education, experience, achievements, resume, and contact.
- Implemented flight controls, navigable celestial stations, project panels, space scenery, environmental objects, and responsive portfolio information panels.

Kanban Task Management Board | React, JavaScript, CSS

Built during DJS Infomatrix Bootcamp

- Developed a task management board with separate To Do, Growing, and Finished columns.
- Implemented task creation, deletion, and movement between columns using React state management.

Silver String – Art Exhibition Website | HTML, Tailwind CSS, JavaScript

Built during DJS Infomatrix Bootcamp

- Designed a responsive art exhibition website featuring curated collections, exhibitions, and artwork.
- Created navigation, exhibition sections, artwork cards, and ticket/reservation interface with a modern visual design.

ACHIEVEMENTS

Winner – Elocution Competition	2023
• Secured first place, demonstrating strong public speaking and presentation skills.	
Runner-Up – Inter-School Debate Competition	2021
• Recognized for effective argumentation, communication, and critical thinking.	
Winner – Inter-School Science Exhibition	2020
• Secured first place, demonstrating problem-solving and scientific thinking.	
Participant – H Ward Science Exhibition	2023
• Participated in the H Ward Science Exhibition, showcasing scientific interest and project presentation skills.	

TECHNICAL SKILLS

- Programming:** C, Java, Python
- Web Technologies:** HTML, CSS, JavaScript, React, Tailwind CSS, TypeScript, Three.js
- Core Skills:** Logical & Analytical Thinking, Problem Solving
- Communication:** Public Speaking, Debate, Presentation
- Collaboration:** Teamwork, Coordination, Collaborative Projects
